Summary:

I completed my Bachelor of Science in Computer Science with a CGPA of 3.51/4.00, where I developed strong programming, software engineering, database, and web development skills.

Study & Professional Experience in Türkiye

I later moved to Istanbul to pursue a Master's degree in Artificial Intelligence at Beykoz University. During my Master's studies, I became deeply interested in machine learning, deep learning, computer vision, Natural Language Processing, transformers, and multimodal AI systems.

ACADEMIC EDUCATION:

DEGREE/CERTIFICATION	EXAMINING BODY	YEAR
Master of Artificial Intelligence	Beykoz University, Istanbul	Feb 2024 - April 2026
Bachelor of Computer Science (BSCS)	Arid Agriculture University Rawalpindi, CGPA 3.51	Sept 2017 - Aug 2021

CAREER PROFILE/SKILLS:

- **Javascript**
- **TypeScript**
- **Node-js**
- **Adonis-js**
- **React-js**
- **Docker**
- **GraphQL**
- **PostgresQL**
- **MongoDB**
- **Php**
- **Wordpress**
- **Laravel**
- **AI (ML/DL)**
- **Networking**
- **Html/CSS**
- **Unity 2D/3D**
- **C#**
- **VPSserver/AWS/AZURE**

Languages:

Urdu/Hindi (Native)	English (Fluent)	Turkish (B2)

University Thesis and Project

Personalized Medication Recommendation System Based on Text or Image Inputs (PMRS)

It is a research-focused deep learning platform that combines **NLP (Transformer Model)** and **Computer Vision (Vision Transformer)** to provide medication suggestions from clinical text and skin-condition predictions from images, exposed through a production-style **FastAPI backend API**.

API layer (FastAPI)

- POST /api/recommend: **text-based medication recommendation + DDI warnings.**
- POST /api/vision/skin-diagnosis: **ViT top-k classification.**
- POST /api/vision/skin-pattern-analysis: **prediction + model/patch-level interpretation.**
- POST /api/vision/skin-pattern-analysis/image: **explainability heatmap-style PNG response**

Technologies:
fastapi, uvicorn[standard], pydantic, pydantic-settings, torch, torchvision, numpy, pillow, pandas, matplotlib

1. **Github link for Backend - Deep Learning** **2. Github link for Front-end (Web/Mobile Application)**

PROFESSIONAL WORK EXPERIENCE:

1. **Freelance:** Fiveer - Out Source Client
   Tenure: July 2023 – Still (Part Time)

   Responsibilities:

   Fiveer - Out Source Client

   - Offered freelance services on Fiverr, completing projects related to WordPress, Node.js, and React.
   - Designed and developed responsive, user-friendly websites and web applications for international clients.
   - Delivered projects on time while ensuring code quality, performance, and client satisfaction.
   - Communicated directly with clients to understand requirements and provide technical solutions.

2. **Organization**: **CapregSoft** (Software Development Company)
   Tenure: December 2022 – July 2023
   Designation: MERN Stack Developer

   Responsibilities:

   Node-js Projects:

   - Created the "@capregsoft/hawqal" Node.js package for efficient worldwide data retrieval. Implemented robust CI/CD processes to streamline the development workflow.
     (chai, mocha, ndb, sequelize, and sqlite3)
     1. Github repo Link 2.NPM package link
   - Developed a proprietary innovative SaaS project called "Email Checker".
     MERN (MongoDB, Express, React, Node.js) stack, along with TypeScript, GraphQL, MySQL, Docker and (NSQ, Socket.io)
   - Developed (Rest Api) for scraping data from 91mobiles.com.
     (Node-js, Mongodb, Express.js, Cheerio, Axios)
     1. WebScrapper Link
   - Implemented Authorization and Authentication in Adonis-js.

Wordpress & Laravel

- Build Wordpress plugin (talknest.com). Integrated Yahoo finance Api (Dashboard)
- Developed Sale Management System.
  (Track sales, user- Authorization, user Role)

3. **Organization**: **TechNerdNYC** (Software Development Company)
   Tenure: January 2022 to December 2022
   Designation: Full Stack Developer

Responsibilities:

Node-js Projects:

- Built MVC architecture software.
  (Node.js, MongoDB, and Express.js with an EJS template).
- Rest api for fitnessguru mobile app and website.
  (Mongodb, Express.js and Node.js).
- Simple Chat Application using (MERN Stack development)

Wordpress & Laravel Projects:

- Developed plugin for service provider to US region.
  (custom post-type, archive and single pages)
  (Leaflet Map, MySql, php, javascript, html and css)
  1. Github Repo
- Integrated Yahoo finance api dashboard.
  (php, Yahoo API, javascript ,html, CSS)
- Build Laravel software for School Management System. Manage attendance and results
  (mysql, Bootstrap-templates, rest API, Deployment)
- Developed pizza order software In Laravel.
  (index mysql table, pagination)

4. **Organization:** **Hpsoft** (Web Development Company)
   Tenure: March 2020 to December 2021
   Designation: Internship - Junior Web Developer

   Responsibilities:

   Web Designing and Web Development:

   Internship

   - Created single web pages (HTML,CSS,JAVASCRIPT).
   - Created Blog website in Wordpress.
   - Created login/Register website for integration with (MYSQL, PHP).

   Junior Web Developer

   - Developed Funded websites (humanityrelief, humanitycare)
